

Ceiling pendants

MP2505 INSTALLATION SHEET

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) dimmer is required.

1.

Remove the fixture from its original packaging and remove the fixture mounting plate from within the hardware package. Attach the fixture mounting plate to the electrical junction box on the ceiling using the two screws provided (1a) in the hardware package.

2.

Pull the wires out of the electrical box, through the wire access hole in the fixtures mounting plate. Now attach all wiring (2b) with the provided marrets (white to white "N", black to black "L", ground to ground "G").

3.

Level the fixture. Using the two holes in the mounting plate (2a), create registration marks on the ceiling. Turn canopy mounting plate away from registration marks and drill appropriate holes into ceiling. Now mount the plastic anchors (3c) into the ceiling. Turn the canopy back to align canopy holes to plastic anchors, secure with screws (3d). Attach the fixture (3a) to the mounting plate (2a), with the two decorative nuts (3b).

4.

You have now completed the installation of your fixture, enjoy.

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.
